WHAT IS TOFUSHI?

TOFUSHI is a Tofu Sushi. The concept is the same as sushi, except the rice is replaced with texturized tofu. TOFUSHI comes in a variety of flavors, such as California Roll, Spicy Ahi, Unagi, and much, much more.

HOW HEALTHY IS TOFUSHI?

Tofushi is a healthy alternative to sushi. It's low carb, low fat and packed with high-quality protein and nutrients. By replacing rice with our unique process of texturizing tofu, we take away the empty calories that rice provides and add valuable protein and nutrients. The protein in tofu comes from Soy, which is complete, so it has all eight essential amino acids. It is also a good source of Calcium, B-vitamins and iron. Tofu is low in saturated fat and contains no cholesterol. Tofushi has a light and fresh taste. Say goodbye to hard rice. Tofushi will not dry out or get hard in the refrigerator.

WHAT IS TOFU?

Tofu is a soybean curd made by curdling fresh hot soymilk with a coagulant called niagari. Niagari is a compound found in natural ocean water, or calcium sulfate, a naturally occurring mineral. The curds are generally pressed into a solid block. There are two broad categories of tofu, firm and soft (silken) tofu. Firm tofu is higher in protein. Firm tofu is also higher in fat and calcium than other forms of tofu. Tofu is also very low in sodium, making it a perfect food for people on sodium-restricted diets.
